DEAL SIGNAL · 09 OCT 2026

Biohaven carves out Asia to fund global Phase 3.

EXECUTIVE TRANSACTION BRIEF

Biohaven licenses MoDE pan-IgG degrader portfolio in Asia

Lead Candidate: BHV-1300 (Phase 3 in Graves' disease) + Next-Gen BHV-1310 & BHV-1320

UPFRONT CAPITAL

$80M

Cash payable at closing

NEAR-TERM TOTAL

$100M

Incl. $20M milestone within 1 yr

ROYALTY RETENTION

~20%

Net sales royalties in territory

PHARMASIGNAL TAKE

Biohaven secures non-dilutive clinical funding without surrendering core

Ono gains an autoinjector IgG degrader platform with established Phase 3 momentum across Japan & East Asia

THE DEAL MAP

Biohaven Ltd.

→ Asian regional rights → Ono

PORTFOLIO & TARGET

MoDE™ Extracellular IgG Degraders

Lead candidate BHV-1300 in Phase 3 for Graves' disease, with autoinjector administration; follow-on degraders BHV-

TERRITORY PARTITION

Ono: Japan, Korea, Taiwan, ASEAN · Biohaven: US, EU, China

Ono leads development and commercialization in East Asia; Biohaven retains Western & China commercial rights.

ECONOMIC ARCHITECTURE

$80M Upfront + $20M Near-Term Milestone

Up to $100M near-term capital + development & sales milestones + ~20% royalties on net sales in territory.

EXECUTION FIT

Ono Regional Depth vs. Biohaven Global Independence

Ono deploys established East Asian regulatory and commercial teams; Biohaven self-funds global Phase 3.

PHARMASIGNAL READ

Carving out Asia protects Western commercial value.

STRUCTURAL EXECUTION INTERFACE

- **Upfront Capital: Immediate non-dilutive runway.**
  $80M upfront + $20M milestone funds global Phase 3 Graves' trials without equity dilution.
- **Royalty Power: ~20% net sales participation.**
  Substantially above typical regional licensing royalty tiers, reflecting Phase 3 maturity.
- **Territory Focus: Zero loss of Western upside.**
  Retaining US, Europe and China keeps maximum commercial value in Biohaven's hands.

THE OPEN QUESTION FOR BD TEAMS

How will regional PMDA requirements align with global Pha

Coordinating Asian clinical data generation, device comparability and multi-asset follow-on gating (BHV-1

PHARMASIGNAL PRINCIPLE

> A successful regional carve-out does not dilute the global asset; it funds the independence needed to commercialize it.
